EMERGENCY RESUSCITATION SYSTEMS

## microvent utilityvent - emergency automatic resuscitator kit

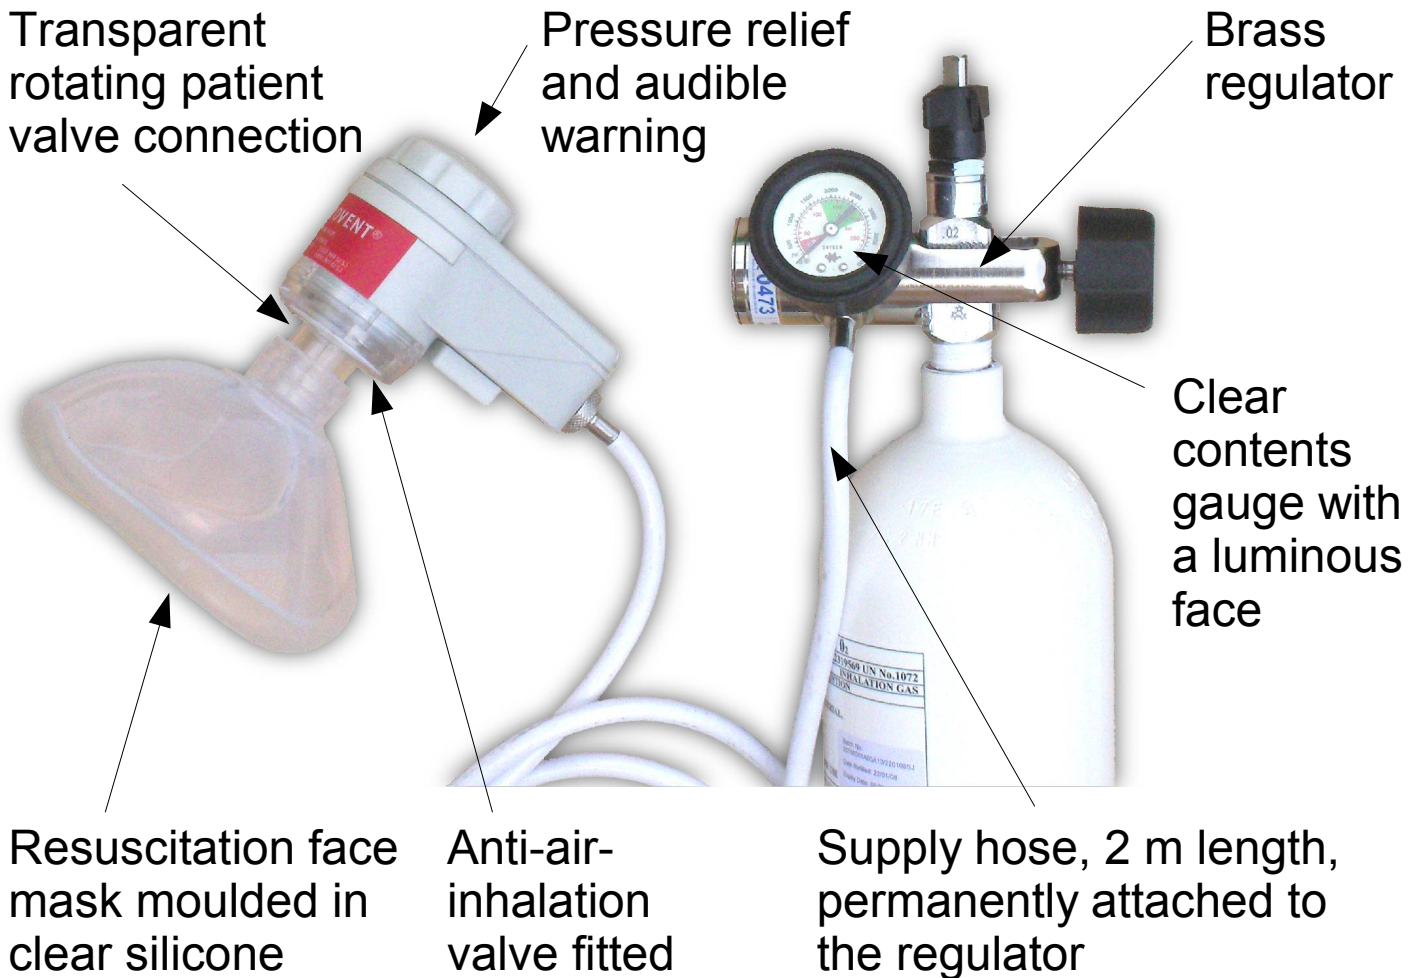

- Automatic resuscitation.
- Resuscitator suitable for use in non-breathable atmosphere.
- Pre-set for adult casualties for ease of use in industry.
- Easy to use in the dark or with poor access.
- Minimal product training needed.

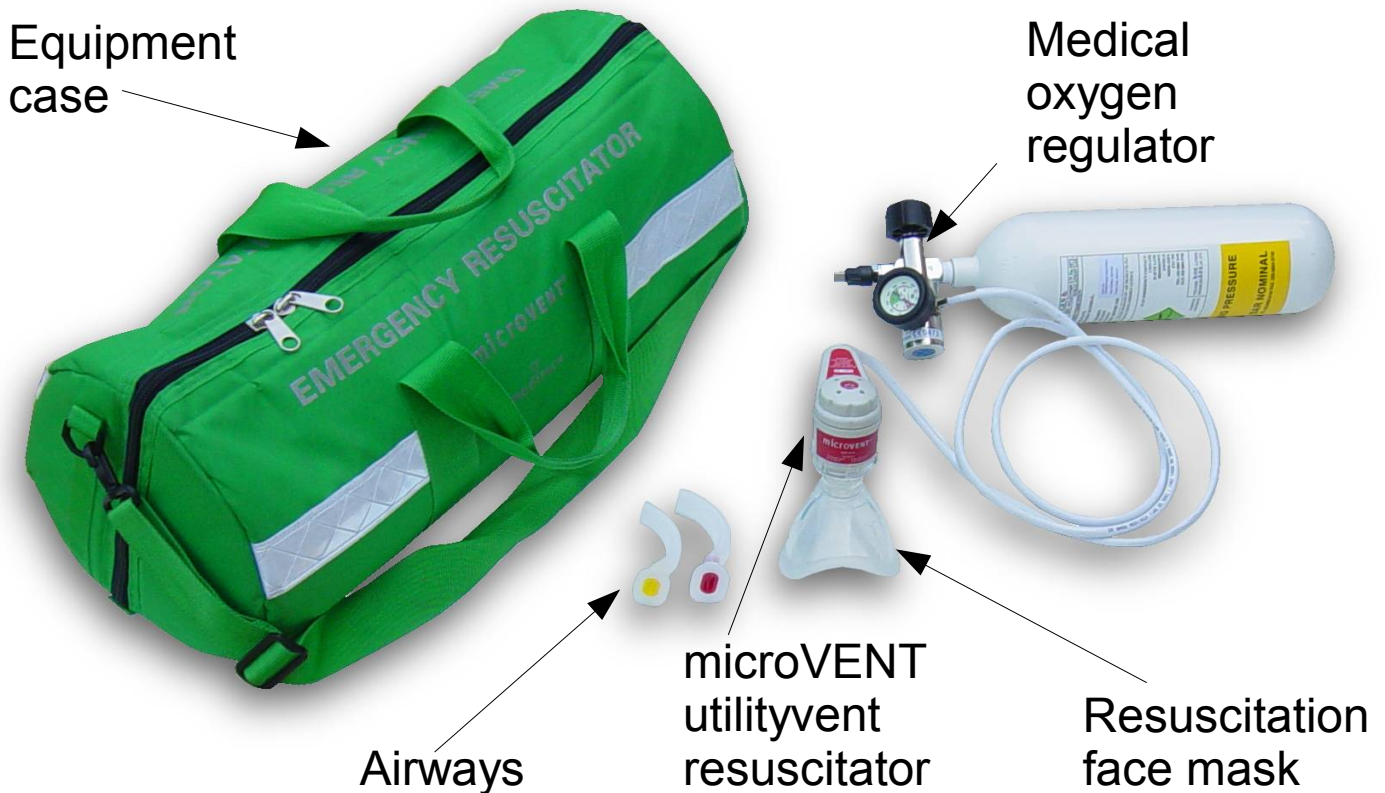

# microVENT<sup>®</sup> resuscitator

at the centre of the utilityvent kit

- The microVENT utilityvent is a hand held automatic resuscitator with compact dimensions and light weight.
- Ergonomic styling gives easy operation of the resuscitator.
- Constructed within a tough reinforced plastic casing the Meditech microVENT is designed to withstand use in difficult situations.
- microVENT patient valve features 22/15 mm connections to take standard airway devices and face masks.
- The oxygen supply hose is two metres long and made of resilient reinforced plastics to retain flexibility in cold conditions.
- The supply hose in the utilityvent kit is permanently attached to the regulator, ready for immediate use.
- Oxygen gauge is luminous to aid use in low light.
- microVENT is used by emergency services around the world.

# microvent utilityvent – emergency automatic resuscitator kit

- The microvent utilityvent kit is designed for use in an emergency when breathing has stopped, or when breathing assistance is needed.
- At the heart of the kit is the microVENT utilityvent resuscitator. This is an oxygen powered resuscitator that is pre-set to breathe for the adult casualty – 600ml breaths, 12 times a minute.
- When in use, if the casualty inhales – the utilityvent supplies a synchronised breath of 100% oxygen.
- The brass safety oxygen regulator fits to pin-index medical oxygen cylinders.
- The microVENT case is reinforced and padded to hold and protect the equipment. It is fitted with twin carrying handles and a shoulder strap. The resuscitator can be swiftly carried to the casualty.
