

# PRODUCT DATA SHEET

Product ID            RGL27 Chaser  
Description:           Single Leg Self Retracting Lanyard

Accredited to:        EN 360:2002  
Web material:         15mm high strength UHMWPE  
Fittings:              RGK1 and RGK2P connectors to EN362  
Length:                0.68 - 1.88m including hooks  
Weight:                1.2kg  
Max arrest force:    < 6kN  
Features:              Fitted with shock absorber pack and  
                              retractor unit with a protective cover.  
                              For workers up to 140kg in weight.

The RGL27 Chaser can be used in any situation that requires a single-leg lanyard. The Chaser however has been specially designed to eliminate working hazards and adjust to a worker's movements.

The RGL27 Chaser features an almost-instant lock off in the event of a fall, and recoils into the drum when slack is introduced into the lanyard. The reduced trip hazard and ultra compact design make this unit ideal for tight work and tasks where a shorter arc of mobility is required. The RGL27 Chaser has a maximum working length of 1.88m.

## Suitable for MEWP operators

*The chaser is certified to EN360:2002. Additionally, it also meets the dynamic requirement of EN355:2002, which involves a 100kg mass dropped a distance of twice the length of the extended lanyard, and the peak force below 6kN. For details of daily inspection procedures, please read the information sheet.*
